Subject: Save The Bay

Dear Teddy, Alexis –

We wanted to let you know about this petition to US EPA that is currently circulating in a Save The Bay mailing. We will follow up about the petition at a later date. A related email aspect of the campaign is pasted below.

PETITION TO GINA MCCARTHY ADMINISTRATOR OF THE ENVIRONMENTAL PROTECTION AGENCY

Dear Ms. Gina McCarthy:

As a Bay Area resident and a concerned member of Save The Bay, I urge you to do everything you can to protect San Francisco Bay from inappropriate development, forever.

You know how special the San Francisco Bay is. I believe the San Francisco Bay and its surrounding lands are important resources and they warrant special attention and protection. It is your responsibility to ensure all laws necessary to protect the Bay, its waterways and the surrounding land.

I oppose any plan that would fill San Francisco Bay, its wetlands or restorable salt ponds. I urge you to protect it forever.

Sincerely,

Registered Petition Number:

Name, City, State

Mike:

Can you believe these guys? Agribusiness giant Cargill is continuing to push for its destructive bay fill development in Redwood City. They'll stop at nothing for profit. Right now they're attempting to evade **federal environmental laws**.

Mike, I need your help today. [Your support for Save The Bay](#) is critical to our efforts to thwart Cargill's unrelenting attacks.

[Will you please make an urgent contribution to Save The Bay right now to help us fight back?](#)

Cargill has petitioned the Environmental Protection Agency (EPA) to get its salt pond development plan exempted from the Clean Water Act—and the only thing standing in Cargill's way is our community of dedicated Save The Bay supporters like you.

Today we're urging the EPA to stand its ground against Cargill, and I hope I can count on your support. [Please make a tax-deductible gift today](#) so we can preserve the Bay and the way of life it offers everyone who calls this area home.

Thank you in advance for your generous support.

Sincerely,

David Lewis
Executive Director

P.S. Cargill wants to roll back all the progress you and I have made to protect the Bay for people and wildlife. Don't let Cargill get away with it—[make your contribution today!](#)
